Intelligent Solutions

 **Hotpoint**

OUR IDEAS. YOUR HOME.

In 2011, Hotpoint celebrates its 100th year in business and this year is the perfect opportunity for us to present the range of built-in and free standing appliances that will complement your new kitchen.

Here at Hotpoint, we recognise that the kitchen is the heart of the home and this is why we design and create appliances that will fit seamlessly into your life.

Beauty, brilliance, technology and style. Browse our collection of stylish cooking, dishwashing, laundry and refrigeration appliances; we've got something to suit every taste, space and vision.

Ovens

With our wide selection of Built-in Ovens featuring two co-ordinated designs, take your pick from the latest ovens built with you in mind.

The range we offer is designed to suit all households and user needs. If you are short on space, *Experience Openspace* is the ideal solution with 20% more capacity than standard single ovens with the same dimensions.

We offer two co-ordinated designs: *Experience* and *New Style*. Both designs are available in Single and Double Ovens with a choice of functionality and many models include Pyrolytic Self Cleaning.

4-9

Further Built In Models

We offer a range of complementary products to complete the range of Built-In appliances in your kitchen.

The Steam Oven is designed with touch controls and is a fast, healthy and convenient way of cooking that seals valuable vitamins and minerals into your food.

The Built-In Coffee Maker brings café culture to your kitchen while the Built-In Warming drawer is ideal for heating plates and dishes or a convenient place to prove dough.

10

Cookers

Designed to make cooking even more pleasurable, Hotpoint's 90 cm wide Range Cookers are packed full of great features. Finished in high quality Stainless Steel, these dual fuel Range Cookers will create a stunning focal point in your kitchen.

In addition we offer 50 cm and 60 cm wide Cookers in electric, gas or dual fuel. You can choose from a selection of finishes and single or double oven options.

Electric, Gas or Dual Fuel? Whatever you want in a free standing cooker, our range of 50 cm and 60 cm Cookers provides exactly what you need

11

Hobs

With Gas Hobs you have fast and variable control. They also provide handy features such as a triple-ring wok burner for excellent heat distribution around the entire pan.

For the safest, cleanest and most efficient hob, you can't beat Induction. Only the base of the pan heats up (not the cooking zone) so just the exact amount of energy you need is used.

With sleek contemporary lines and touch controls, our Ceramic hobs offer up to 9 flexible power levels and individual timers for each zone.

12-14

Our selection of Cooker Hoods are designed to complement the overall look in your kitchen.

Hotpoint Hoods are available in a choice of 60 cm and 90 cm widths so you can match your hood to your hob. Ideally the hood should always be at least the same width as your hob to ensure that the best extraction rate is achieved.

15

All Hotpoint hoods can be ducted, where the air is extracted directly outside the property via ducting, or used in recirculation mode, where the air recirculates back into the kitchen after passing through a filter to remove odours.

Cooker Hoods

Loaded with features our dishwashing range fit into any kitchen style. We offer free standing, fully integrated and slimline dishwashers to complete the programme.

Our latest fully integrated A rated model offers 12 place settings, 11 wash programmes, with super-quiet noise levels ensuring you won't be disturbed.

16-17

When space is an issue you can choose the Slimline 45 cm integrated dishwasher. With 10 place settings and 6 Programmes, all your cleaning needs are catered for in the smaller space.

Dishwashers

Give your kitchen the ultimate streamlined touch with an integrated Hotpoint fridge or freezer. The wide range of integrated fridges and freezers available from Hotpoint ensure that, whatever your needs, there is a model for you.

Alternatively you can set off your kitchen in style with Hotpoint's award winning *Fridge Drawers* or the iconic *Quadrio* 4 door fridge freezer.

18-23

Included in the cooling range is the Built-In Wine Cellar which can store 24 bottles of wine for those relaxing dinner parties.

Cooling

Laundry doesn't need to be a chore with Hotpoint's class-leading washing machines, tumble dryers and washer dryers.

The stylish free standing range includes a 9kg Steam Washing Machine and a 9kg tumble dryer ensuring even the busiest homes are catered for.

24-26

The Built-In Washing Machine and Washer Dryer both have Eco Cycles that save from 50% to 70% of the energy used - a big plus on your daily wash.

Laundry

With the constant research and development carried out by Hotpoint, we are continually coming up with new and improved electronics and programmes.

The Glossary will give you a better understanding of all the key features of our range and ensure that the appliance you select suits your needs.

27

If you require a more detailed specification on any model, please log on to www.fff.ie where you can access the complete specification of all the appliances.

Glossary

Fast Clean-Pyrolytic Cycle: Oven heats to over 500° burning off fat / waste leaving a layer of ash which can be wiped clean.

Solarplus Grill: Heats to full temperature after only 15 seconds. The grill mesh is practically self cleaning which saves time and inconvenience.

Fan Grilling: The grill element is used with the circulaire fan circulating heat all around food. Great for browning, crisping and gratin finish. Same results as a rotisserie.

Flaze: Cor bottom is baking of

Low Temp defrost: defrosting dough to:

Low Temp warming: warming

Low Temp Circulaire: reduced to perfect

Pastries P

Insulating Divider

Fast Clean Pyrolytic Cycle

Total Electronic Control

2 Individually Controlled Electronic Programmable Timers

Both with Time & Temperature Controls

Triple Glazed Door

Oven Door Lock

Air Flow Cooling Fan and Internal Chimney Venting

Energy Efficiency: **A Rated**

70 Litre Capacity

Finger Tip Resistant Stainless Steel Finish

20% more space than a standard single oven. The revolutionary design gives you a huge 70 litres capacity with the ability to cook on 4 levels at once.

The brilliance doesn't stop there! You can convert this extra large space into a double oven by simply inserting the insulating divider to create two separate cooking zones; both with their own independent time and temperature controls.

One Oven: Four Cooking Zones

Small Space

The divider allows the use of just the top part of the Oven. There are two functions in the Small Space: Fast Cooking & Grill.

Main Space

The divider allows the use of just the bottom two thirds of the oven as a fan oven.

Double Space

Both spaces can be used at the same time; at two different temperatures with independent programmable timers. The divider is fully insulated so there is no transfer of flavours between compartments.

Extra Large Space

Extra Large Space offers 10 cooking programmes including Hotpoint's 4 'Intelligent Cooking' Functions. It can be used as one extra large space or 4 shelves at once.

Experience 10PT Single Oven

10 Cooking Programmes:

- 4 Intelligent Programmes: Roast, Bread, Cake, Pizza
- 6 Standard Programmes: Multi-Cooking, Variable Grill, Fan Grilling, Low temperature 40°C, 65°C and 90°C

Choosing your hob...

Hotpoint Gas Hobs

With gas hobs you have fast and variable control. They also provide handy features such as a triple-ring wok burner for excellent heat distribution around the entire pan.

Additionally the double ring burners give you flexibility to cook with anything from a small milk pan to a huge casserole pot depending on the setting chosen.

Hotpoint Induction Hobs

For the safest, cleanest most efficient hob, you can't beat induction. Only the base of the pan heats up not the cooking zone, so just the exact amount of energy you need is used.

The heat is extremely easy to control and contents of the pot raise to full temperature quickly and efficiently. Any part of the cooking zone not in contact with the pan does not heat up.

Hotpoint Ceramic Hobs

With sleek contemporary lines and touch controls available, our ceramic hobs offer up to 9 flexible power levels with residual heat indicators.

The surface is exceptionally easy to clean and with the child lock option, you can prevent little hands from adjusting the controls.

Dimensions: W 595 x D 550 x H 850 mmF

Key Features Explained...

Fast Clean-Pyrolytic Cycle: Oven heats to over 500° burning off fat / waste leaving a layer of ash which can be wiped clean.

Solarplus Grill: Heats to full temperature after only 15 seconds. The grill mesh is practically self cleaning which saves time and inconvenience.

Fan Grilling: The grill element is used with the circulaire fan circulating heat all around food. Great for browning, crisping and gratin finish. Same results as a rotisserie.

Variable Grill: Half Grill Option providing a solution for small portions with maximum performance.

Combination Microwave: Microwave combined with all the features of a standard grill and fan cooking.

Conventional Programme: Combined heat from top and bottom. Ideal temperature in centre of oven. Great for home baking.

Multi-Cooking: Uniform heat distribution enables cooking of different types of foods on more than one shelf.

Fast Cooking: Combines all heating elements coming on alternatively with the Circulaire fan at full power. Cooks several dishes at once, and fresh food 20% quicker than conventional.

Circulaire Fan: The fan and rear element circulate even heat. Reduces cooking time by 20% and temperature by 10-20° compared to a conventional oven.

Circulaire Roasting: Same as circulaire fan above but allows hot air to be circulated underneath the food. A raised trivet allows fat to fall away from the meat.

Pizza: Combining circulaire fan and bottom heat which guarantees rapid baking of dough or pastry.

Low Temperature 40°C: Reduces defrost times by half and proves dough to perfection.

Low Temperature 65°C: Ideal for plate warming and defrosting.

Low Temperature 90°C: Combining Circulaire heating element and reduced power grill, cooks casseroles to perfection.

Pastries Programme: Guarantees rapid baking of pastry with a golden finish.

Steam Cooking: A fast, healthy & convenient way of sealing valuable vitamins and minerals into your food. No transfer of flavours.

Flame Failure: Flame suppression device that cuts off the gas if the flame goes out.

Residual Heat Indicators: An indicator lights up to tell you the surface of the hob is still hot, even after you have turned off the controls.

Triple Ring Wok Burner: Innovative triple ring optimises the power of gas and allows quick and uniform cooking.

Double Ring Burner: A powerful burner capable of cooking whatever you want quickly! The flame can be regulated independently on each burner (from 0.9 to 5.0kW).

Baby Cycle : Intensive wash designed to cleanse and remove harmful bacteria from crockery and cutlery used to feed babies / young children.

Rapid 27/35: Ultra fast wash to clean lightly soiled items in 27 / 35 minutes.

Eco Wash: Using low energy in the wash cycle for an environmentally friendly wash with great cleaning.

Water Stop / Overflow: Automatically shuts off water to the dishwasher if problems with waterflow occur.

Dual Space: Allows upper basket in the dishwasher to be easily height adjusted, even if fully loaded.

Ice party: White wine or champagne is quickly chilled and a discrete signal lets you know when they are ready.

Fully Frost Free: The circulation of cold air in both the fridge and freezer prevents the build up of ice.

Ice Care: The ice trays are set into the drawer of the freezers giving easy access to ice cubes.

Antibacterial Protection: This is built into the fridge liners inhibiting the growth of harmful bacteria and reducing odours.

Conservation Time: The time in hours food will be conserved in the event of power failure.

Super Freeze: Rapid freezing of fresh foods to preserve their quality.

Super Cool: Lowers temperature of the fridge to rapidly cool new items.

Washing Machine Eco Cycles: Allows for daily cleaning of cotton, linen and synthetics. The fast cycle allows you to freshen up or wash fabrics that are slightly dirty in thirty minutes.

Set and Forget Drying: Sensors monitor the moisture and temperature in the machine to adjust to the level of drying that you choose; iron, hanger or cupboard.

Baby Cycle Washing: Designed to tackle the toughest stains associated with babies and young toddlers.

Delay Start: Allows you to delay start time of wash cycle at the press of a button.

Condenser Dryer: Tumble dryer does not need an external vent. Moisture is collected and stored for easy disposal.

Steam Refresh Cycle: A 20 minute programme to refresh garments.

Steam Hygiene Cycle: Additional period of steam at the end of a normal cycle ensures a deep and thorough antibacterial cleanse.

OUR IDEAS. YOUR HOME.

Need an answer?

If you have a question about any Hotpoint appliance, simply pick up the phone. We can give you information about individual models, ranges and specific features. Our information line is open from 8.30 am to 5 pm Monday to Friday.
