SIMPLY GENIUS

 **FABER**  
AIR MATTERS

## ADVANCED TECHNOLOGY

This technology offers pleasant natural lighting and faithfully reproduces the colour of the illuminated items at just 2W.

Allows the hood to be switched on for 24 hours a day for continuous air renewal with a level of noise that is imperceptible.

Double boost and 5 suction speeds operated by touch slider controls.

Filter saturation alarm: warns you when it is time to clean the anti-grease filter or substitute the anti-odour filter.

A high performance filter that reduces extraction by 15% and lasts twice as long as standard filters.

The hood will turn on at the most suitable speed automatically, adapting the extraction capacity to the maximum cooking level.

Allows automatic delayed switching off of the motor to complete elimination of residual odours.

Waterproof motor technology, which guarantees normal functioning and complete safety even if large quantities of liquid are spilled on the hob.

Bridge Zones allow you to adjust the size of your cooking zone to suit your requirements.

Reduces the perceived sound by 25%. This aspiration guarantees optimised effectiveness.

The motors compact design also means that it is the only product in its class that leaves enough free space for a drawer to be fitted beneath.

85% power consumption (kW/h) at medium-low speeds that are most often used. It is the most silent motor on the market.

Energy Diffuser: it reduces noise up to 3dB(A) and increases hood efficiency by 30% even in the presence of long air outlet.

The Evo diffuser has an optimised geometry that results in excellent energy efficiency, reduced power consumption and noise level.

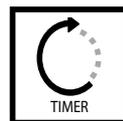

The ability to install the motor away from the hood frees it from architectural constraints and reduces noise in the kitchen.

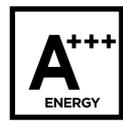

Function which activates maximum aspiration for 6 minutes to meet special cooking needs.

Faber hoods with electronic commands come with remote controls, which are particularly useful for people with reduced mobility.

Galileo has a min-max timer function to allow for perfect cooking performance.

The hood and hob form a superbly efficient duo, characterised by attention to detail and amazing performance. Touch slider controls are complemented by maximum power, total safety and silence.

# AIR MATTERS

For most people, air is something intangible, an ethereal free spirit. But at FABER, we know how to weigh it, measure it, work with it and shape it just like a solid material. After all, we've been working with air for over 60 years. Our innovative technology improves the quality of air and with it the quality of life, giving you a greater sense of well-being and bringing comfort and harmony into your home.

GALILEO

# GALILEO

The hood and hob form a superbly efficient duo, characterised by attention to detail and amazing performance. Touch slider controls are complemented by maximum power, total safety and silence.

Double boost and 5 suction speeds.

### SIMPLY GENIUS

The Galileo hood, named after a true Italian genius, is a jewel of technology in energy efficiency class A+++, and the top of Faber's induction range.

Invisible but extremely functional, Galileo is a perfect combination of hood and hob in a single, worktop-height package.

CAST IRON GRID FLUSH FIT

Galileo stands out for its waterproof motor technology, which guarantees normal functioning and complete safety even if large quantities of liquid are spilled on the hob.

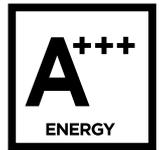

Only  
60 cm.

GALILEO CAN FIT  
IN 60 CM  
DEEP WORKTOP

**AUTOMATIC FUNCTION**  
The hood will turn on at the most suitable speed automatically, adapting the extraction capacity to the maximum cooking level.

To deactivate this function simply press the key A, later it can be started up again by pressing the same control and the LED "A" will light up.

## HOOD FEATURES

### FINISH

Black glass/Cast iron grid

### CONTROLS

Touch slider

### GREASE FILTER

Dishwasher safe filters

### Ø OF AIR OUTLET

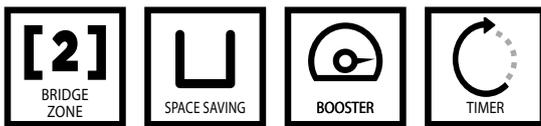

220x90 mm

### ENERGY CLASS

A+++

### ACCESSORIES

Charcoal filter FO1CF14

## HOB FEATURES

### FINISH

Black glass

### PRODUCT DIMENSIONS LXW (MM)

830x520

### RECESS DIMENSIONS LXW (MM)

802x492

### INDUCTION ZONE

4  
2100-3700 W single  
4200-7400 W bridged

### CONTROLS

Touch slider

### POWER (W)

7400

### VOLTAGE (V)

220-240

### FREQUENCY (HZ)

50/60

## HOOD PERFORMANCE

SPEED	MAX	INT	BOOST
AIR CAPACITY IEC POINT	470	590	700
PRESSURE	350	590	800
INPUT	65	110	145
NOISE LEVEL	66	73	76

## INDUCTION HOB FUNCTIONS

BRIDGE ZONES	2
POWER SETTINGS (STAGES)	9
TIMER MIN-MAX	1-59 min.
BOOSTER (P)	Yes
AUTO SWITCH OFF	Yes
OVER TEMPERATURE PROTECTION	Yes
VOLTAGE ABNORMALITY PROTECTION	Yes
CONTAINER DETECTION SYSTEM	Yes
AUTOMATIC SHUTDOWN PROTECTION	Yes
POWER ON INDICATOR	Yes
CHILDLOCK	Yes

# GALILEO

## INSTALLATION OPTIONS

Rear ducting version installation

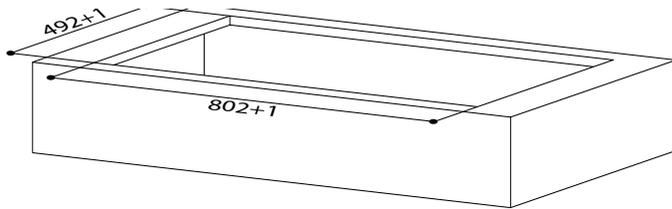

Lateral ducting version installation

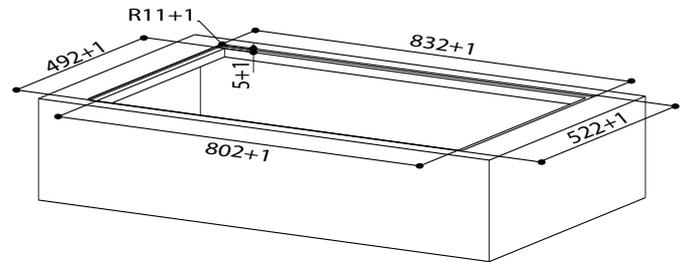

Front recycling version installation

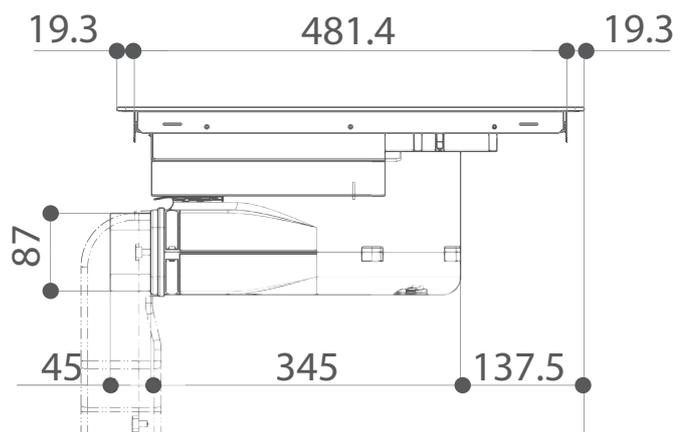

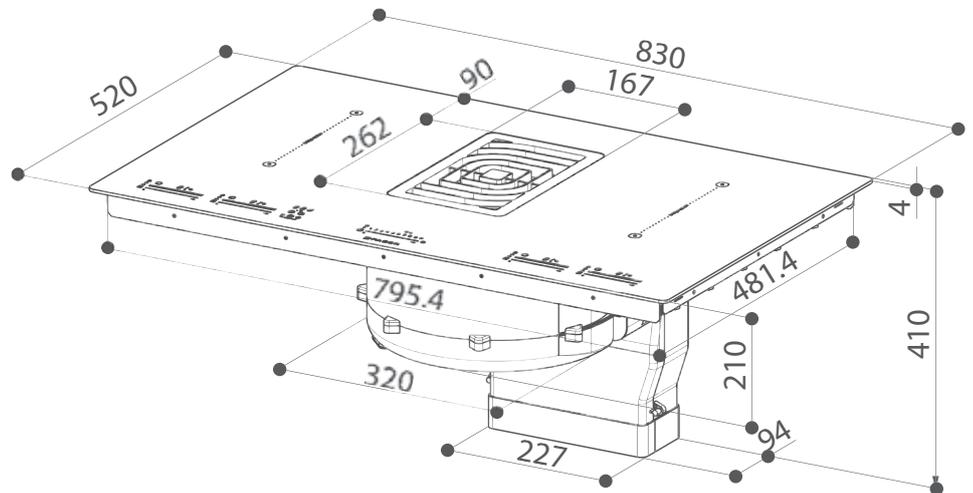

## STANDARD INSTALLATION

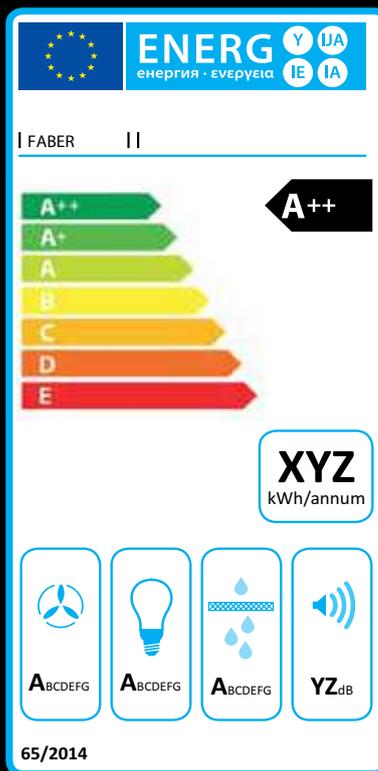

## FLUSH FIT INSTALLATION

## TECHNICAL DRAWING

### ENERGY LABEL FOR CLEARER SAVINGS.

Energy Efficiency Class: hoods with the highest ratings (A++, A+, A) consume less and are more respectful of the environment (green colour).

Annual Electricity Consumption: calculated for standard hood functioning times (60 minutes of suction and 120 minutes of lighting a day).

Fluid-dynamic efficiency: reveals the quality and power of the hood: efficiency rises as suction power increases or energy consumption decreases.

Lighting efficiency: this indicates how much light the hood produces for the energy it consumes; for the same lighting power, more light-efficient hoods consume less.

Filter efficiency: indicates the filter's capacity to capture grease.

Noise level: measured in dB at the hood's maximum fan speed (not boost).
