# **Itho** Hot and boiling water products

# cesign a convenience

Model Shown I Gusto Chrome

Boiling water straight from the tap is the latest trend in the kitchen at home and at the office. Making a cup of tea, peeling tomatoes or boiling an egg will only take a fraction of the usual time. A practical kitchen appliance that will prove its effectiveness every day.

# Instant **boiling water** at your fingertips

Itho surpasses all competition by offering innovative and convenient products delivering hot water, boiling water, or even both, instantly. The entire system consists of a special boiling water tap and a heater that is built in under the sink. There are two versions of the boiling water heaters. The H2OTAP is a compact boiling water heater that easily fits behind the kitchen plinth. The H2OTAP+ is Itho's most powerful kitchen water heater. This system will instantly provide you with a generous amount of boiling and hot water.

Do you want a separate boiling water tap, or a 3-in-1 Tap for boiling, hot and cold water? Which tap fits the style of your kitchen at home or the office? A modern square design tap or do you prefer an elegant, rounded model? The taps can be fully rotated, making it possible to install them for left-handed and right-handed use.

#### H2OTAP Benefits - heater

- Instant boiling water.
- Instant hot water.
- Space saving plinth water heater (4.5 litre)
- Behind the plinth installation (unique in Europe)
- Under cupboard installation. Only 14 cm high!
- Boiling water at 100°C (unlike majority of competitors)
- Saves water and energy.

- Heating time from cold to fully loaded (5 litre unit 22 minutes, 10 litre unit 35 minutes).
- Standing loss 32 Watts per hour / £ 0.09 per day.
- Copper vessel.
- 5 years warranty on vessel. 2 years on parts.
- 5 Litre unit is maintenance free (fit and forget),
  10 litre unit easy to maintain (no expensive service contract)

#### H2OTAP:

- Instant boiling water, up to 2,7 litres
- Compact, even fits behind the kitchen plinth, no wasted storage space
- With optional Combi Installation set
- Instant hot water, up to 14 litres

#### H2OTAP+:

- Instant boiling water, up to 7,5 litres
- Instant hot water, up to 32 litres

#### Close-in Compact :

- Instant hot water, up to 14 litres (40°C)
- Saves water and energy
- Smallest model fits behind the kitchen plinth

#### H2OTAP Benefits – tap

- Cold, hot and filtered instant boiling water from 1 tap (3-in-1).
- Boiling only model available with optional matching mixer.
- No design clash and space saving on the counter top.
- Saves a standard mixing tap (£ 180+).
- Hole size identical to normal mixer tap (35 mm).
- Retrofit possibilities.
- Cool touch spout (patented tube-in-tube).
- Cool touch body (patented).
- Safe push-turn knob with built-in recoil spring (boiling).

#### Boiling Water Tap Caldo:

- Delivers boiling water
- Child-friendly safety feature with
- a recoil spring in the push-turn knob
- Matching kitchen mixer tap available

#### 3-in-1 Tap Dolce/Gusto:

- Child-friendly safety feature with a recoil spring in the push-turn knob
- Fits the existing mixer tap hole
- Delivers cold, hot and boiling water

# Safety, our highest priority

Safety is paramount in all of our products, and where boiling water is involved it is even more crucial. All of our boiling water taps are equipped with a child safety feature using a recoil spring in the push-turn knob. This prevents unintentional or unguarded use of the boiling water tap, the recoil spring immediately stops the water jet when the button is released. In addition, the design of the outflow keeps the temperature on the outside of the spout at a safe level, the water jet is very compact, in order to reduce splashing to a minimum.

# Safety

The boiling water taps by Itho have been equipped with various techniques in order to guarantee safety.

#### Tube in tube

In the outflow of the 3-in-1 tap, this technique separates the boiling water completely from the hot and cold water. This prevents boiling water from flowing out when you are running hot or cold water. It also keeps the tap cool to the touch.

#### Push-turn knob

In order to prevent unintentional use of boiling water, the boiling water taps are equipped with a push-turn knob. You have to push and turn the button before you can run boiling water. For instant switch off release the button immediately causing the recoil spring to stop the flow.

#### **Compact water flow**

The design of the flow-reducing nozzle ensures a compact, quiet boiling water flow. This limits splashing as much as possible.

## Assortment of taps

**3-in-1 tap Modern:** the 3-in-1 tap delivers cold, hot and boiling water. We offer a range of 4 distinct models for the 3-in-1 tap Modern – in chrome or stainless steel, and in a square or round version. The 3-in-1 tap fits the existing hole of your mixer tap (Ø 35mm).

Flow rate tap at 3 bar	All Taps	
Mixed water (cold/warm)	10 litre per min.	
Boiling water	3 litre per min.	

**Chrome round DOLCE** 590-1010

Stainless Steel round Dolce

**Tap set Modern:** if you prefer a separate boiling water tap, we offer the boiling water tap Modern and a matching kitchen mixer tap Modern.

**Chrome Square Gusto** 590-1060

Stainless Steel Square Gusto 590-1085

Additional option: both the 3-in-1 taps and the kitchen mixer tap come with a short lever (in both chrome and stainless steel) in situations where there is not enough space for the longer lever to operate (if installed close to the wall).

**Chrome round Mite** 590-1250

Chrome round Caldo 590-1200

Short lever (64 mm) chrome 590-4037 stainless steel 590-4038
