

Dispensa Larder -

The next level of storage for your kitchen

Kesseböhmer has over 50 years of manufacturing experience and are Europe's largest manufacturer of larder units. Their production facility, located in Germany, is over 1,000,000 square feet and is managed by the current generation of the founding family.

Kesseböhmer products can be found in all leading kitchen companies as their name stands for innovative solutions. They combine design, function and quality in all of their storage solutions, benefiting you while adding value to your kitchen. The quality and design of their products add to the life of the kitchen and, by offering a wide variety of storage solutions, adapts your kitchen to your lifestyle.

Kesseböhmer design has you, the kitchen user in mind. As a result you can adjust and customise your choice of accessories. From the style of baskets to the height of shelves within a larder. This offers you control over the storage in the kitchen and allows for flexibility as your needs change over time.

The Dispensa Larder is just one example of the clever and flexible storage solutions designed by Kesseböhmer. It uses all of the space available within a cabinet and allows a clear view of contents. The choice of basket finishes from classic to contemporary allows you to combine function and design in your kitchen.

Market leading storage

Dispensa Larder is designed to make the most of the space within the cabinet. All of the baskets that are used with Dispensa Larder have three sides. By allowing the cabinet door to act as the fourth side, extra space is gained at every level of the unit.

Dispensa Larder uses a running system which can carry up to 120kg of weight. When you open the Dispensa Larder, the runner extends smoothly and allows you to see the entire contents of the cabinet. This offers you quick and easy access and eliminates those times spent searching for items 'at the back' of a cabinet.

Storage needs can change over time therefore fast and easy adjustment is a must. The Dispensa Larder baskets are all height adjustable. Just lift the basket, reposition it at the height you need and then hook it onto the frame. Simple and fast adjustment of the basket positions allows you to customise the Dispensa Larder to your unique needs.

Clever connection points mean the full width of the basket is available for storage.

Proven Quality

The Dispensa Larder unit runs on a unique runner system that is designed to carry up to 120kg weight.

The Dispensa Larder unit has been independently tested by LGA in Germany and has been shown to perform to 60,000 openings and closings when fully loaded.

Silent Performance

The Dispensa range of larders are supplied with Soft Stopp Plus which is a high performance soft closing system. Soft Stopp Plus offers silent, effortless closing, reducing the noise levels in the kitchen.

Award Winning Design

The Dispensa Larder was also awarded the Interzum award. The award is given for high quality both in the product design and the materials used. Any product which is given this award must show innovation that is easily seen by the user.

The choice of basket finish

The Kesseböhmer Dispensa Larder is available with a choice of five different basket designs in three different widths.

All Dispensa Larder baskets are manufactured from high quality steel with a choice of solid timber or traditional wire bases. Baskets with solid bases have the advantage of better storage for small items and any spills are easily cleaned.

Designed by Kesseböhmer, the latest innovation is the special Anti Slip coating which is applied to solid base baskets. This unique coating prevents all groceries from slipping and sliding when the Dispensa Larder is in motion.

ARENA Style with Anti Slip

Kesseböhmer's latest basket design is the ARENA Style. Polished chrome flat bands surround a solid grey base. The polished finish of the chrome is accented by the muted solid grey, and the sleek design follows the very latest design trends. The addition of the Anti Slip coating ensures absolutely secure storage, even in the most robust of environments.

Further basket choices

The Kesseböhmer Dispensa Larder is also available with the following basket types

Chrome: High quality steel with superior strength in a polished chrome finish.

Comfort Line: Twin steel rails in soft matt finish which surround a solid grey base.

Soft Aluminium: High quality steel with superior strength in a soft matt finish.

Arena: Twin steel rails in polished chrome finish which surround a solid grey finish.

Touch Control

Touch Control allows you to open the Dispensa Larder with a gentle tap. Just a small tap drives a trigger extending the Dispensa larder runner, allowing you full access to your cabinet with minimum effort.

With Touch Control, door handles are not necessary which gives a contemporary design to the finished kitchen.
