# sensio®

furniture lighting solutions
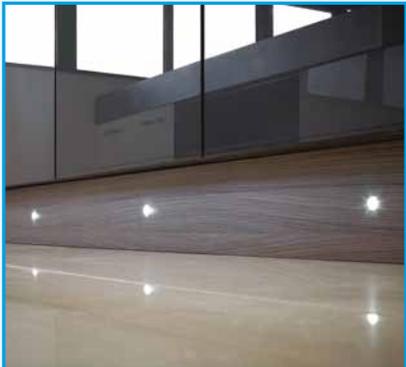

sensio®

Sensio has become the market leader in kitchen lighting, and we're always looking to the future. We're proud of our heritage. And even prouder of the fact that we will continue to design and develop the most ground-breaking lighting solutions for you and your customers. Innovation has always been at the heart of what we do. With our comprehensive training support and experienced sales team all originating from the furniture industry; we believe we have the skills and understanding to meet your expectations.

Quality: When you deal with Sensio, you're dealing with quality. It's something we simply won't compromise on. With our sole focus on LED, we're talking more longevity. Greater cost efficiency. More innovative, versatile and imaginative high quality lighting solutions than ever before.

Innovation: Innovation has always been at the heart of what we do. We don't just follow the trends - we help set them. From stunningly practical task and convenience lighting to state-of-the-art mood lighting that truly brings a design to life, we've designed the most imaginatively impressive product portfolio around.

Unique: We're proud to bring you the most ground-breaking lighting solutions designed and developed by the very brightest minds in the lighting industry. This brochure presents the very latest breath-taking, unique LED lighting systems and demonstrates how you can create individually-tailored lighting that's unique to your kitchen design.

Award winning: Our innovative lighting solutions have been recognised by the industry and have rightly received, or been shortlisted for some of the highest accolades, as shown below.

HD LED

Although the initial cost of an LED fitting is higher, they last over 13 times longer than Halogen, saving you money on replacement lamps. The savings you will make on electricity bills more than offsets this initial difference. Thanks to the low power consumption of LED's you will see significant energy cost savings - meaning cheaper electricity.

A testing station was set up to measure the energy usage of an LED light v a Halogen light of equal brightness. The difference in energy used was staggering. One single LED light will save you €4.63 annually

SENSIO have calculated that you can save over 90% on running costs when you use LED fittings

Save energy, save money!

Save over €510.00 over the lifetime of the lamp on electricity and replacement lamps when switching from Halogen to LED*

*Savings based on €0.173 per KWH when 8 HD lights are used for 4 hrs per day (60,000/3,000 = 20 lamps) 20W Halogen lamps with 3000 hours at €1 each.

Cool White vs Warm White Lamps

Cool White LED is best used in contemporary kitchens for high gloss doors, granite worktops etc. Cool White LED is still brighter than the Warm White LED so that is to be taken into consideration for certain specifications. Use of Cool White for convenience lighting is preferable as it is brighter.

Warm White LED is better suited to the more traditional kitchen designs, wood or painted doors and wood worktops. Warm White LED is the closest in colour to halogen, which a lot of consumers are used to and comfortable with. Warm White HD LED fittings can be used as an energy efficient direct replacement for halogen lighting.

The Warm White LED is more aesthetically pleasing with most timber/traditional types of kitchens and worktops. Another element that is making an impact is the current rejuvenation of painted kitchen doors, we have found that irrespective of what colour the actual door is, the Warm White light augments the painted effect, whereas Cool White can quite often either bleach the colour or bring out a grey undertone which detracts from the actual colour. Gloss White and ultra-modern styled kitchens are much better suited to Cool White LED.

Cool White   Warm White

Flanagan Fittings

Hype HD LED Recessed/Surface light

- The fitting can be either surface or recess mounted.
- Stainless Steel finish with either cool or warm white LED.
- Each diode has a lens over it to intensify the light output.
- Use under cabinets or to illuminate cabinet interiors.
- Over 90% less energy used when comparing to halogen.
- Save money on electricity bills with HD LED (See page 2).
- Long lamp life lasts up to 11 years more than halogen.
- Full range of switches and dimmers. See page 11.
- Optional 2.5 mtr extension cable Art. Nr. SE9009.
- Cool White (5000K) and Warm White(3200K)

Incline rechargeable light

- Features an integrated PIR sensor which automatically switches the light on when the wardrobe door is opened.
- The PIR will remain on for 30 seconds and then automatically switch off to ensure there is no power wastage.
- This fitting is available in 5 standard lengths, however can be cut down if required.
- No electrical installation required. Contains a Lithium-ion rechargeable battery.
- The run time of the product is 6.5 months based on 2.5 minutes of use per day. The charging time is 4.5 hours on average.
- Recharge the unit using the SE2005 pluggable USB charger.
- Cool White (4500K) LED for optimum light output.

Incline rechargeable light
