AIR MATTERS
COLLECTION 2021

FABER
AIR MATTERS

LEAVING A NEW IMPRESSION IN THE AIR

At Faber, we are always looking for innovative technologies and solutions inspired by nature that respect the environment so that you can live in better harmony with the planet at home.

IMPROVING AIR SINCE 1955, TO MAKE THE WORLD A HAPPIER PLACE.

There's nothing we don't know about air at FABER. Our know-how in suction allowed us to invent the kitchen hood. Over the years we've moulded air into a thousand forms, just like steel, plexiglass, glass and wood. As if by magic, we've compressed it, made it disappear and reappear from nowhere. We've turned the kitchen hood into an object of design and a work of art.
We've given it smart functions as a light fitting, air conditioner and filter and even connected it to the future. Always quick to see how the world is changing, we're still innovating today, to make tomorrow's air even purer.

We use air technology in another way too: to improve people's wellbeing and their quality of life. Living with a FABER hood means feeling protected in your home and natural environment. It means the satisfaction of comfort and versatility, and improving with every day that passes.
FABER works to make your wishes come true, to let you breathe the air of your dreams.
Everybody has a world of their own and we want to make it a happy one.

1955
Faber Plast is founded.

1958
The first Plexiglas hood.

1986
NOVA
The first chimney hood.

1995
AXIA
The first T-shape hood.

1999
M@STER
The first smart hood.

2004
MATRIX
The first hood that hangs like a picture.

2008
KLIMA
The first air conditioning hood.

2010
F-LIGHT GENERATION
The first chandelier hoods.

2016
TALÌKA
The first totally vertical hood.

2018
GLOW
With Airlane Technology

2019
GALILEO
The first hob extractor in A+++

2020
K-AIR
The first touch screen connected hood with air quality sensor.

HEADQUARTER
Fabriano - ITALIA

A **VISION** OF **GLOBAL** REACH

FABER has a lot in common with air... both are present all over the world. Air has always been our chosen material. Now the world is our home. So it's only natural we should want to improve them both.

INVESTING IN THE WORLD
Always growing, to serve more people.

THINKING LONG TERM
All-round competence: automation,
robotics, IT, total quality.

INNOVATING CONTINUOUSLY
Engineering research, advanced solutions,
living benefits.

DESIGNING THE FUTURE
Ergonomics, design, functionality, comfort,style and wellbeing for the home.

PEOPLE ARE OUR INSPIRATION

At Faber, we know how to look far but also very close. **We look at people because they are our inspiration**.

Their needs, desires and dreams are the basic principles for which **we strive to supply better and better answers, time after time**. Everyday actions in a kitchen, even the smallest ones, tell of a daily routine that is a matter of careful study for us so they can be simpler, safer and more spontaneous for you. Everything depends on **wellness** of the people.

SAFETY IS IN RELIABLE HANDS

Reliability is a constant characteristic of all
FABER products. It becomes easier to appreciate with time, a certainty.
When everything is working as it should, home is a more relaxing place. And when the air is pure and clean,
home becomes a place of true wellbeing. That's what reliability means to us: making life better for years to
come.

RECORDS IN EXCELLENCE
- The first **ISO 9001** Quality Certification in the field of kitchen hoods.
- **SGS Certificate of Excellence n°001**: a worldwide first.
- Integrated Management System for Quality (**ISO 9001:2015**), Occupational Health and Safety (**OHSAS 18001**) and the Environment (**ISO 14001**) certified by SGS.
- Products conforming to the strictest safety requirements and to standards **EN 61591** and **EN 60704-3**, tested in an authorised in-house laboratory, certified and guaranteed by leading international bodies.
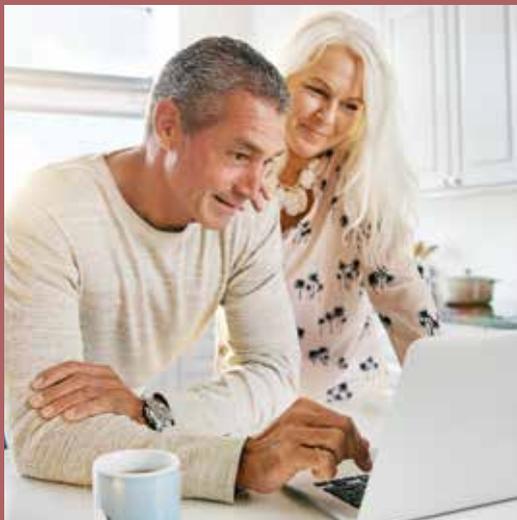

IMQ The Italian Quality Mark
SEMKO International Safety Certification by Intertek ETL
CCC The Chinese Quality Mark

CE The EU Safety Mark
UL The Quality Mark for the USA and Canada

DREAM

TRENDY, CONTEMPORARY, TECHNOLOGICAL.

A design that expresses distinctive aesthetics, care to detail and innovation to make you live the comfort of your kitchen environment as a new experience.
A hood equipped with the trendiest applications of the moment and the smartest features, such as a timer, remote control and connection to the home automation system.

EMOTION

TIMELESS, COMFORTABLE, VERSATILE.

The technology that makes the kitchen more welcoming, turning it into the heart of the house. Quiet, efficient and with a lower impact on the environment. A hood that knows how to excite with the presence of natural materials, such as wood, and warm colours. And it can create a laid-back atmosphere, hinting to tradition and packed with style.

SMILE

PRACTICAL, FUNCTIONAL, CURRENT

The simplicity that makes you love it and the ease of use that improves everyday life, with the certainty of constant and enduring reliability. A hood that is also easy to clean and that satisfies all practical requirements while being remarkably effective in neutralising fumes, vapours and odours in the kitchen, making the environment even more comfortable.

ADVANCED TECHNOLOGY FOR REAL LIFE BENEFITS.

FABER CLOUD

The exclusive Faber Cloud app can be used to monitor the air quality in your kitchen and adjust the main settings of your hood at any time, even from your mobile phone.

K-LINK

With the radio connection between the hood and Faber induction hob, the suction power is automatically adjusted according to the selected cooking level to optimise performance and avoid unnecessary waste.

AIR QUALITY SENSOR

Keep temperature, humidity percentage and the presence of volatile organic compounds under control in the domestic environment. The sensor automatically adjusts the suction power until perfect air quality is restored.

SIL & STILL

All hoods in the line-up already have a noise level at the maximum power of only 52 dB(A). The Eco Function can be activated by combining the effects of SIL & STILL TECHNOLOGY and the exclusive BRUSHLESS motor, for continuous 24-hour, energy-efficient air exchange in the surrounding environment, silently below 40 dB(A).

ZERO DRIP

Stop condensation! Zero Drip collects it in a frame preventing it from dripping onto the hob. Zero Drip Plus makes it evaporate thanks to the specially heated glass of the hood.

NAUTILUS

More power, less noise, superior comfort! Faber technology increases suction capacity by 30 m3/h, reduces noise and improves efficiency, always with minimal consumption.

ARIES

With the power of two brushless motors, Aries achieves a suction capacity of over 700 m3 abating noise by 9 dB(A). The superior, energy-saving and quiet performance of Aries puts vertical hoods in Class A.

BRUSHLESS
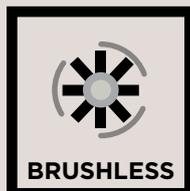

The brushless motor guarantees considerable energy saving coupled with high extraction efficacy. It is the most silent motor on the market and its performance remains stable in any usage condition.

WATERPROOF

Any liquid spilled during cooking flows directly into a suction grille and is collected in an automatically drained tray under the hood, small enough to leave space for a utensil drawer.

POWER MANAGEMENT

POWER MANAGEMENT

Adjustable absorption setting on 4 power levels (KW). No more blackouts at home!

FILTER ALARM

FILTER ALARM

Filter saturation alarm: warns you when it is time to clean the anti-grease filter or substitute the anti-odour filter.

ANTI TOUCH

ANTITOUCH

Special smudge-proof materials for a perfectly clean hood and a surface without annoying stains.

REAR OUTLET

REAR OUTLET

The rear air outlet available with many FABER hoods allows fumes to be channelled to the rear instead of upwards. This eliminates the need for an upper duct, freeing up useful space above the hood.

SOFT TOUCH

SOFT TOUCH

FENIX®, a high-tech material with unique characteristics. Soft and smooth to the touch, matt and smudge-proof surface.

DELAY 30

30 DELAY 30

Automatic shutdown delay: you can postpone the motor shutdown to eliminate residual odours completely.

PERIMETER ASPIRATION

PERIMETER ASPIRATION

25% less* perceived noise. Perimeter suction exploits the Venturi effect to accelerate the air flow through a narrow gap. The air slows down again once inside the hood for more efficient extraction.

*Equivalent to a reduction of 3 dB(A) according to EN 60704-3.

HFH FILTERING

HIGH FILTERING

Capable of eliminating 95% of bad smells, the technology guarantees maximum effectiveness in activated carbon filtering. HFH technology makes the hood more efficient for air purification from all odours..

REMOTE BLOWER

REMOTE BLOWER

Available on many products, it allows you to install the motor away from the hood to reduce the noise in the kitchen. For acoustic comfort at the highest level.

SELF START

SELF - START

A special sensor switches the hood on as soon as air temperature reaches 35°C.
A smart sensor activates your hood automatically whenever needed. Faber loves to make cooking easier and more enjoyable!

AUTOMATIC FUNCTION

A AUTOMATIC FUNCTION
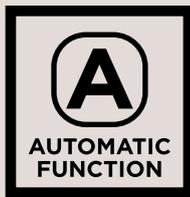

The hood will turn on at the most suitable speed automatically, adapting the extraction capacity to the maximum cooking level.

HOUR 24
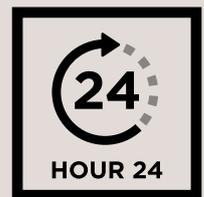

24 HOUR 24

Key 24: function which allows the hood to be switched on for 24 hours a day for air renewal with a level of noise that is imperceptible.

LED LIGHT
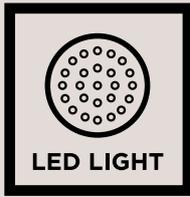

LED LIGHT

Thanks to the LED lighting you will have a brilliant light and excellent visibility over the entire cooking area, with a considerable energy saving.

SPEED I

INTENSIVE SPEED

Intensive speed: function which activates maximum aspiration for 6 minutes to meet special cooking needs.

BOOST

BOOST

Thanks to the Double Intensive Function. Even the most persistent cooking steam and smells are eliminated in just a few minutes.

LED LIGHT DIMMER

LED LIGHT DIMMER

Dimmable light: at the touch of a button the light is dimmed down and can be left on for a long time with minimal energy consumption.

TUNABLE WHITE

TUNABLE WHITE

On some models, you can choose and vary the colour temperature of the light, from warmer (tending to yellow) to colder (tending to white).

LONG LIFE FILTER

3 YEAR OPTIONAL LONG LASTING FILTER

Multi-layer filter, it guarantees a double filtration and an optimal air cleanliness,that lasts for up to 3 years and are dishwasher safe

TOUCH CONTROL

TOUCHSLIDER

Extremely comfortable, user-friendly Touch Slider controls.

REMOTE CONTROL

NEW REMOTE CONTROL

The new remote control is compatible with many Faber hoods. To adjust suction and special functions, such as the courtesy light, 24H, Up&Down and Steam Off features. Controlling your hood is easier than ever.

HIGH EFFICIENCY

OPTIONAL HIGH PERFORMANCE FILTER

High-efficiency filter, it guarantees more than 80% filtration capacity of intake fumes and a duration of up to 6 months.

GREEN INNOVATION.
THE FUTURE IS IN OUR HANDS

WE ALSO THINK ABOUT THE PLANET
Making sustainable choices is essential to respect the world we live in. Therefore, it is important to choose a hood that is energy-efficient. By developing solutions aimed at lower environmental impact and greater energy savings, Faber also takes care of the planet

LED LIGHT
All FABER hoods incorporate LED lighting technology. The LED units consume next to nothing and produce a pleasantly natural light that ensures perfect visibility without altering colours

HIGHER CLASS ENERGY
Today, Faber hoods are confirmed in the highest energy classes. They ensure superlative performance and minimum consumption of the suction motor, filtering system and lighting. The top-of-the-range Galileo hob extractor achieves excellence in Class A+++.

A^{+++}
ENERGY

LED LIGHT
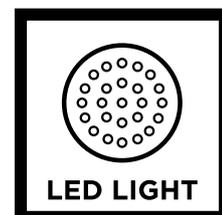

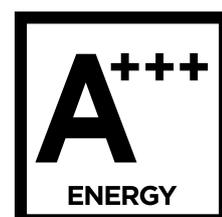

K-LINK TECHNOLOGY
AND THE HOOD ADJUSTS ITSELF AUTOMATICALLY
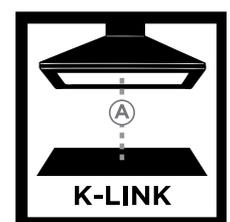

K-LINK

FREE HANDS IN THE KITCHEN. THANK YOU, FABER

The beauty of cooking is also that you can express yourself freely, without distractions. If you have an induction hob and a Faber cooker hood with K-LINK connection, just start cooking and the suction power of the hood automatically adjusts to the selected cooking level.

HOB AND HOOD DIALOGUE WITH EACH OTHER

Faber has created an intelligent connection between hob and hood, through an integrated system that works with radio waves. A simple gesture is all it takes to set the hood to automatic operation. The system is always active because the radio signal is never interrupted. At the same time, the perfect operation of the hood is guaranteed avoiding the waste of energy and excessive noise that you could have set the suction at a level too high compared to the produced fumes.

AUTOMATIC ADJUSTMENT OF THE HOOD POWER TO EXTRACT VAPOURS AND ODOURS.

The connection is always active even in the presence of dirt residues on the hob.

It can be controlled manually whenever you want.

K-LINK

CONDENSATION IS NO LONGER A PROBLEM

FABER ELIMINATES THE PROBLEM OF CONDENSATION
Eliminating condensation is essential to protect the wall unit where the hood is installed and to prevent drops of moisture from falling onto the hob. Faber has succeeded by creating special anti-condensation systems of total effectiveness.

ZERO DRIP
The Faber Zero Drip and Zero Drip Plus systems stop condensation after it has formed. The first one collects it in a groove preventing it from dripping onto the hob. The second makes it evaporate through contact with specially heated surfaces.

ZERO DRIP

ZERO DRIP PLUS

Pressing a button on the glass part of the hood activates a heating resistor that makes the condensation evaporate completely.

QUIETNESS THAT RESPECTS NATURE

THE FIRST COMFORT IS SILENCE
To make the kitchen a comfortable environment to live in, it is essential to have a hood that works making as little noise as possible, even at top power.

BRUSHLESS MOTOR
Faber is constantly looking for technologically advanced solutions and with this motor, it guarantees the best energy efficiency on the market.

SIL & STILL TECHNOLOGY
Based on the study of aerodynamic flows inside the hood and targeted sound insulation, this Faber technology reduces noise at top power to just 52 dB(A). By activating the Eco Function, it ensures continuous air exchange in the surrounding environment for 24 hours, silently and with minimum consumption below 40 dB(A) comparable to the quietness of a library.

REMOTE BLOWER
The noise of the hood can be minimised by moving the motor away.

SIL & STILL

BRUSHLESS
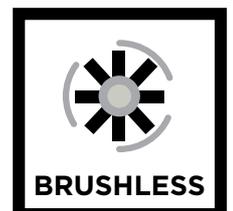

REMOTE BLOWER

NOISE OF JUST 52 DB(A) AT TOP POWER

SIL & STILL

THE ECO FUNCTION ACTIVATES CONTINUAL AIR EXCHANGE IN ULTRA-SILENT MODE

THE SILENT PLEASURE OF A REMOTE MOTOR

REMOTE BLOWER

REMOTE SUCTION KIT

The remote suction kit, with the utmost simplicity, makes it possible to move the hood motor away from the cooking area.

THE SILENCE INCREASES SIX METRES AWAY

With the Remote Suction Kit, the motor can be moved to another location of the house up to six metres away from the hood. Minimal noise and maximum comfort are ensured not only in the kitchen but also in the living area.

KITCHEN
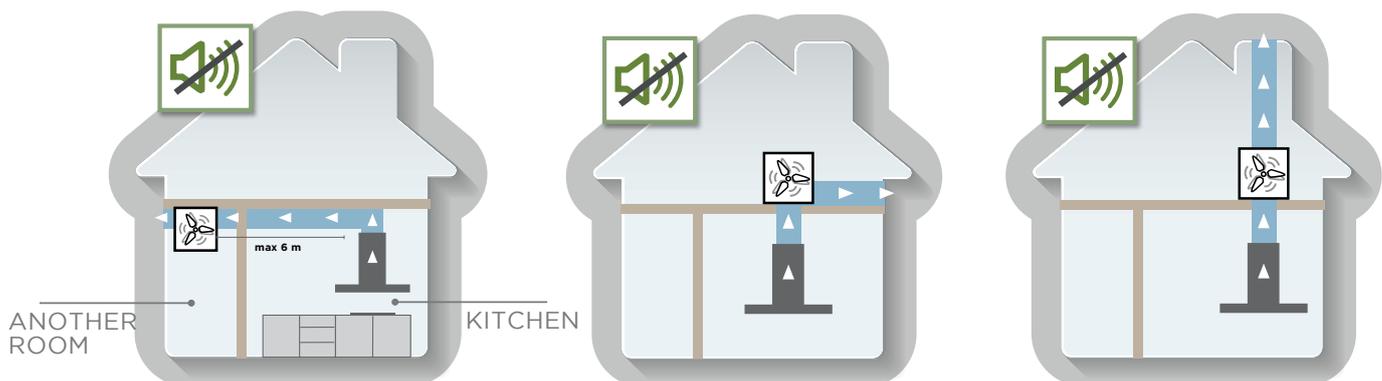

SOFT LINE
REVOLUTIONISES DESIGN

Soft Line is the Faber range of hoods made with FENIX®, a high-tech material with unique characteristics. The matte, smudge-proof surface is soft to the touch and reflects very little light. It is non-porous to facilitate daily maintenance and cleaning.

FENIX® is a material with high resistance to scratches, abrasions, dry heat and acids. Its properties make it perfect for kitchens
.
Another characteristic is that it can self-heal surface micro-scratches.

SOFT TOUCH

OPAQUE

ANTITOUCH
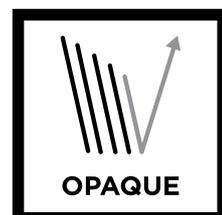

The Faber Soft Line consists of a suspended hood F-light (Soft Cube) and two vertical wall-mounted hoods (Soft Edge e Soft Slim). They are all available with three FENIX® finishes: Grigio Londra, Bianco Kos or Nero Ingo.

SOFT CUBE

SOFT EDGE

SOFT SLIM

LESS CONSUMPTION, MORE EFFICIENCY

FLAT DESIGN AND MAXIMUM COMFORT

Completely flat vertical hoods, for an even more trendy ultra-slim design. This is achieved with the Faber diffusers that concentrate the maximum suction power and the best energy efficiency in just 15 cm.

NAUTILUS

The exclusive diffuser design naturally inspired by the golden ratio for superlative comfort and outstanding performance.Nautilus hoods are Ultra Thin, Low Energy consumption with Hi efficiency

ARIES

With the power of two brushless motors, Aries achieves performance with a suction capacity of over 700 m3 abating noise to 9 dB(A). The hoods with Aries technology are in Class A+.

Glam-Fit	Glam Fit Zero Drip	Glam Fit Zero Drip Plus	Soft Slim	Talika

HFH TECHNOLOGY

HIGH FILTERING NO BAD SMELLS

HIGH FILTERING

ONLY FABER HOODS ELIMINATE 95% OF ODOURS.
What's the most effective activated carbon filtration technology? It's called HFH, which stands for "HIGH FILTERING HOOD". And it's a FABER exclusive, of course. HFH improves hood performance by removing odours from the air almost totally.

A LARGER SURFACE AREA AND TWO LAYERS OF ULTRA-EFFICIENT FILTER MATERIAL.
Faber's potent HFH technology is based on a cylindrical filter design with a far larger surface area. It's twice as effective too, because it uses two high-effciency filtration layers with different porosities and activated carbon concentrations. That's how the filter captures both large and small particles.

FABER MAKES THINGS EASIER...QUIETLY.
Unlike other activated carbon filter systems, HFH also reduces noise by around 3 dB(A). And the smart, cylindrical shape of the filter makes easy work of removing the dishwashercompatible filter material.

AIR TREATMENT
SMART HOODS

HOODS CONNECTED TO YOUR WORLD

All hoods in the AIR TREATMENT by Faber range fit an Air Quality Sensor. This innovative device
monitors the air and activates suction if it detects the presence of allergens, pollutants or odours.
By storing data on the Faber cloud, via an app that can be downloaded to smartphones, you can monitor
the air quality at home at any time, even remotely.

K-AIR WITH INTEGRATED MONITOR

K-Air is an intelligent vertical hood with a built-in 21" monitor that can be controlled directly via the
touchscreen or app. The exclusive Sensor Air Quality keeps the temperature, the percentage of humidity
and the presence of volatile organic compounds (VOC and VOC), Carbon Monoxide and Nitrogen dioxide
and methane under control in the domestic environment. The sensor activates the hood as soon as
pollution thresholds are exceeded, primarily in the space where you cook.

FABER
CLOUD

AIR QUALITY
SENSOR

THE IDEAL SOLUTION
FOR YOUR **SMART HOME**

FREES INTERIORS OF ODOURS AND POLLUTANTS

MONITORS HUMIDITY AND TEMPERATURE AND IMPROVES AIR QUALITY

CONNECTION TO YOUR INTERNET BROWSER MAKES YOUR FAVOURITE WEB PAGES ACCESSIBLE ANYTIME (AVAILABLE ON K-AIR MODEL)

THANKS TO THE FABER CLOUD, YOU CAN ACCESS IT FROM ANYWHERE AND CHECK YOUR HOME ENVIRONMENT

ALL FUNCTIONS CAN ALSO BE MANAGED VIA THE FABER APP

The exclusive App is designed to monitor air quality in your kitchen and manage the hood remotely too, with simple and intuitive functions.

A RANGE THAT IS **ALWAYS CONNECTED**

AIR TREATMENT by Faber is a complete range comprised of vertical, ceiling, T-shape and built-in hood models. All the hoods are equipped with an Air Quality Sensor, connection to the Faber Cloud and can be controlled remotely via the App. In addition, the K-air model comes equipped with the exclusive 21.5 inch integrated monitor.

ASPIRATION HOB

GALILEO.
A simply brillant hood

A+++
ENERGY

THE MOST EFFICIENT.
The pinnacle of aesthetic perfection with the integration of cooktop and hood in a single product for outstanding performance.

WATERPROOF

MAXIMUM SAFETY IN THE KITCHEN.
Waterproof technology guarantees operation and safety even in the event of liquids spilling onto the cooktop. They do not interfere with the cooking and are collected in a special compartment below.

SUCTION SPEED

THE MOST EFFECTIVE.
With its clever fluid-dynamic design, Galileo stands out for its high collection capacity of up to 6.6 metres per second. Even the most persistent cooking vapours and smells are eliminated in just a few minutes.

EASY TO USE.
The cooktop surface is smooth and seamless allowing dirt to be removed in one simple step.

SPACE SAVING

SPACE SAVING.
In the base cabinet Galileo has a smart drawer where you can easily storage cooking utensils.

TOUCHSLIDER

EASY TO USE.
The convenient and user-friendly touch slider controls allow you to adjust the cooking zones and the suction level with a simple action.

[2] BRIDGE ZONE

UNLEASH YOUR CREATIVITY.
The cooking zones can be activated in combined mode to use them together with the same level of power, ideal for cooking food in large pots.

USEFUL
The grease filter is extremely efficient and is also functional because it works as the first barrier and can collect up to 0.5 litres of liquid. It is easily removable and dishwasher-safe.

A++ ENERGY · SIL & STILL · OPTIONAL HIGH PERFORMANCE FILTER · PERIMETER ASPIRATION · BOOST · BRUSHLESS · NEW REMOTE CONTROL · INTENSIVE SPEED · LED LIGHT · 3 YEAR OPTIONAL LONG LASTING FILTER
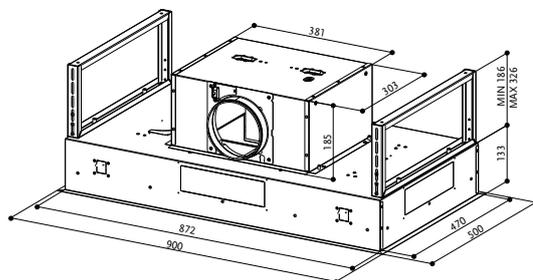

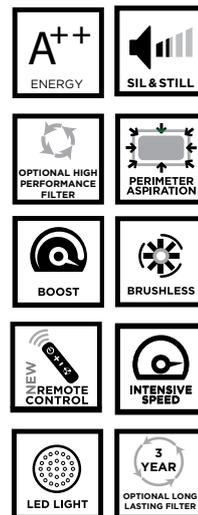

YOUR KITCHEN'S SILENT GUARDIAN.

Look up and you'll appreciate its linear design, but otherwise Onyx-C blends into the background, and all you notice is the pure air.
Onyx-C incorporates FABER's exclusive SIL & STILL technology. This new technology includes an Eco button that activates an ultra-silent mode to bring your kitchen maximum comfort with minimum energy consumption. The button's green light is the sole proof the system is working. The silence is broken only by applause for the Faber technology that places the hood in energy efficiency class A++.

HOO-B GLASS	100

HOO-B COOKTOP,
THE NEXT-GENERATION FITTED HOOD

A sophisticated yet minimalist look for the new fitted HOO-B hood, which is embellished with a special aluminium trim that makes it even more stylish.

The glass panel fits over the hob without interrupting the continuity of its forms and lines, guaranteeing the utmost quality at all times. The Touch control commands also make it possible to operate the hood and induction hobs with the touch of a finger.

When in use, HOO-B opens, lifting its cover and revealing its extraction surface. When you have finished using it, the cover goes back down to create a single worktop again.

For those that love pure minimalism, the new model also comes in the HOO-B Glass version with no aluminium trim.

Hoo-B must be combined with FBH32 induction hobs.

Remove the glass cover before using the hood.

The Hoo-B hood attracts all cooking streams ensuring the maximum result of extraction completely built-in the kitchen top.

FABER
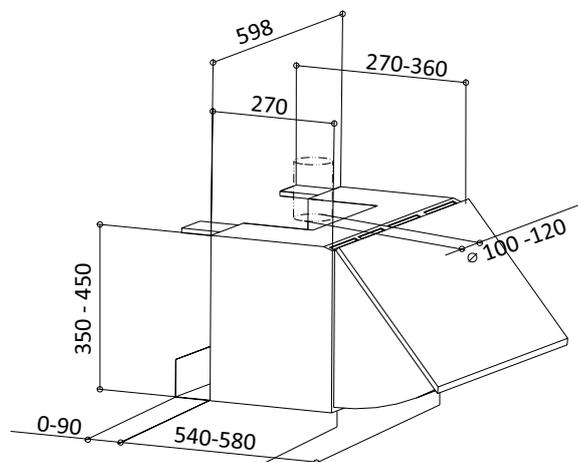

HFH Filter - Premium Performance

HFH filters only reduce extraction rate by 5% and they can be washed in the diswasher up to five times.

Filter Code	Cooker Hood	RRP	
F01HFH01	HFH kit including filter for; Nice, Ray,	€323	
F01HFH01R	Replacement filter for HFH kit	€211	

Hood Cap

For use with hoods in recycle mode without chimney. Deflects exhased air from hitting the ceiling and prevents dirt from falling into the motor.

Filter Code	Cooker Hood	RRP	
F05HC1	Stainless Steel for use with Daisy	€34	
F05HC1BK	Black Finish for use with V-Air, Soft Edge, Glam Light Zero Drip Plus, Glam Light Zero Drip, Glam Light, Tweet	€28	
F05HC1WH	White Finish for use with V-Air, Soft Edge, Glam Light Zero Drip Plus, Glam Light Zero Drip, Glam Light, Tweet	€28	

Remote Blower

The ability to install the motor away from the hood frees it from architectural constraints and reduces noise in the kitchen. Motor can be installed up to 7 meteres from the hood.

Filter Code	Cooker Hood	RRP	
F10RB01	Bella, Chloe, Chloe XL, Daisy, Glassy Island, Heaven, Heaven Air, Heaven Compact, Heaven Glass, Inca Lux, Inca Lux Glass, In-Nova Comfort, In-Nova Premium, Maxima, Nice, Ray, Solaris, Stilo Island, Strip, Strip Smart, T-Dark, Tratto Island, Tweet, Veil	€238	
F10RB02	Fabula	€170	

Remote Control

| Filter Code	Cooker Hood	RRP	
F05RC2	Bi-Air, Bella Comfort, Bella Comfort Island, C-Air, Fabula Plus, Glow, Heaven 2.0, Heaven Air, Heaven Flat, High-Light, In-Light, In Nova Premium, Inca Lux, Odette, Onyx-C, Onyx-V, Onyx-T, SkyPad, Soft Edge, Soft Slim, T-Air, T-Dark, T-Light, T-Light Island, Talika, Twice, V-Air, V-Air Flat	€70	

Splashbacks

High Quality Stainless Steel Splashbacks for 60 and 90 cm wide hoods

Code	Cooker Hood	RRP	
F06W6063	60 cm Bella, Strip, Vesta	€79	
F06W9063	90 cm, Strip, T-Air, T-Light, Vesta	€132	
F06W1001	100 cm Solaris Corner	€269	
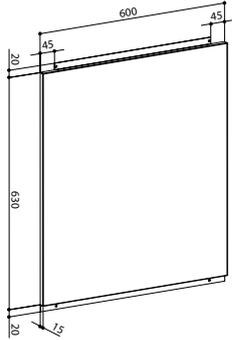

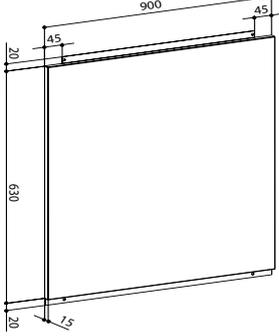

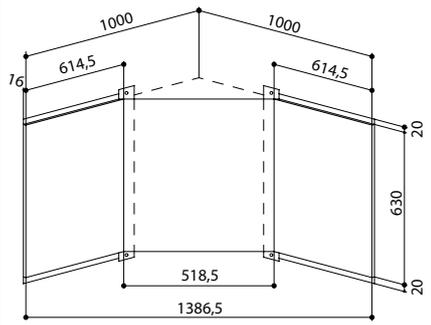

FABER

CHOOSE THE RIGHT HOOD

The necessary extraction capacity is determined by the volume of the kitchen. An effective hood changes the air of the kitchen 10 times per hour. A powerful motor is quieter and uses less energy because it is effective at low speeds.
-A hood does not create noise disturbance if its capacity is
sufficient without exceeding 55 dB(A) of sound power.
-A powerful motor can be efficient even at lower, quieter speeds.
1 Fan Handbook - F. Bleier 1998

EFFECTIVENESS =
kitchen m^2 x Kitchen Height x 10 Changes of Air

Example: A 15 m^2 kitchen which is 3 m tall requires a hood which aspirates at least 450 m3/h. Infact: 15 m^2 x 3 m x 10 = 450 m^3/h

Now consult the performance table found in the product catalogue.

The hood is efficient if an equal or higher capacity value is found in one of the speed columns**.**

| Speed	1	2	3	4	INT
Air capacity IEC point	110	195	260	313	430
Pressure	-	-	-	-	-
Input	30	45	55	70	100
Noise level	48	53	58	62	69

m^3/h
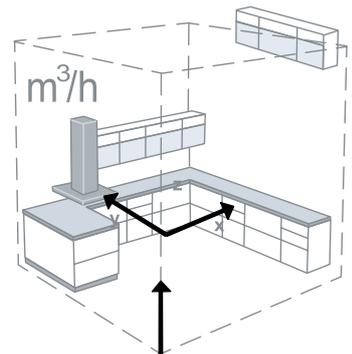

INSTALLATION

Proper installation begins with an inspection. When choosing a hood, you should know:
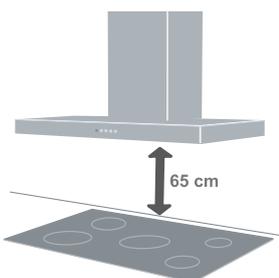

m³/h
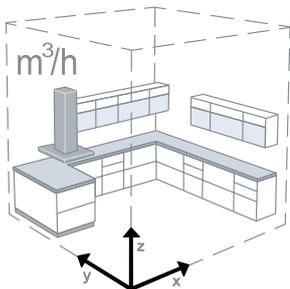

Kitchen volume (which determines the necessary aspiration capacity).
See above "Choosing the right hood."

90 cm

90 cm
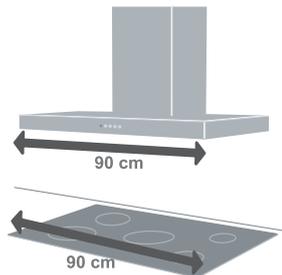

Length of the cooking top (thehood is generally as long as thecooking top area).
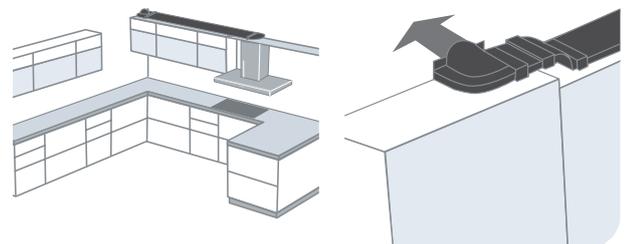

The position and distance of the exit hole (very long and very curved right-angled tubes limit hood efficiency).

65 cm

The hood is to be installed at a minimum distance of 65 cm from the cooking top, except for particular models where is specified in the technical drawing and instructions manual.
ATTENTION: the product guarantee will not be considered valid if this distance is not respected. The hood may not reach declared performance levels if the distance from the cooking top exceeds 75 cm. Some vertical-installation models (ex. Cocktail) are to be installed lower.

Please check the product's technical manual and installation guide for min and max didtances for each hood.

USE AND MAINTENANCE

ON
accendere
1 min. prima

OFF
spegnere
5 min. dopo

cottura

1 min.prima   5 min.dopo

Switch on the hood a minute before cooking begins to create air flow that channels fumes and steam toward the aspiration surfaces.
If necessary, leave the hood switched on even after cooking is finished so that all steam and odours can be properly aspirated.

- Wash the metal anti-grease filters by hand or in the dishwasher every two months[1]
- Replace synthetic anti-grease filters every two months
- Regular filter maintenance guarantees
efficient hood use
ATTENTION: grease deposited on the filters is inflammable: be sure to perform regular maintenance

[1] These intervals of time refer to a regular use of the hood, approximately 3 hours per day

Hood cleaning
- Remove impurities with a damp sponge and a small amount of neutral soap[2]
- Rinse with a damp cloth
- Dry with a soft cloth, if the hood is in stainless steel, follow the steel brushing
- Clean the internal hood conduit once a year

[2] Acid-based cleaning products can damage hood surfaces

---

First cleaning

- Remove the protective films
- Remove impurities with a damp sponge and a small amount of neutral soap
- Rinse with a damp cloth
- Dry with a soft cloth. If the hood is in stainless steel, continue witha steel glaze
- You can give stainless steel hoods a protective treatment with the Faber Clin&Clin tissue

Faber hoods benefit from 60 years of competence in air treatment

- We were the first in the kitchen hood sector to obtain an ISO 9001 company qualitysystem certificate.
- System integrated with Quality, Safety and Environment certified by SGS respecting the ISO 9001:2000, OHSAS 18001 and ISO 14001 norms.
- We have received the SGS Excellence Certificate, the absolute first in the world, number 001.
- All Faber hoods conform to European safety standards (EC mark of conformity), and have also been certified by the IMQ, a reliable, independent organisation further guaranteeing clients on quality (IMQ mark of security).

Faber Hoods are designed for Safety
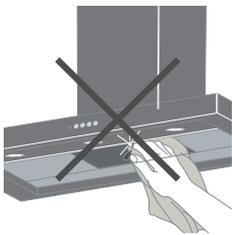

Hammered internal edges and tempered glass to avoid risks of cutting.
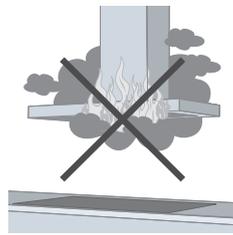

Thermo-protected motors and self-extinguishing plastics help avoid any risk
of fire.
Electronics are solid state, cables and connections are all placed correctly to avoid electric shock or dangerous sparks.

All Faber hoods have undergone safety and performance tests. Aspiration and noise capacity have beenmeasured according to standard norms:

- EN 61591
- EN 60704-3
unique specifications for surveying kitchen hood performance.

ATTENTION: Comparisons between differentbrand hoods should be carried out on complete data obtained according to these standards.

The Faber laboratory is NEMKO and IMQ certified.

Notes:

If you wish to view the range of Faber Hoods, why not visit our showroom and advisory centre, simply contact us to make an appointment
